DETAILED ACTION

1. Claims 1, 2, 6-12, and 21-30 are allowed over the prior art of record.

2. The following is an examiner's statement of reasons for allowance:

Regarding Claims 1, 2, 6-12, 21, and 22, the invention as claimed, specifically in combination with a sensor for sensing an object buried beneath a surface of the earth, with a movable housing and at least one supporting extension mounted to a housing and fully rotatable about a first axis, each sensor rotatably affixed to a supporting extension and fully rotatable about a second axis parallel and offset from the first axis to scan an area of the surface of the earth, and a mechanism to fully rotate each supporting extension about the first axis and each sensor about the second axis to cause the sensor to scan the area of the surface of the earth as the housing moves across the area, is not disclosed or made obvious by the prior art of record.

Regarding Claims 23-30, the invention as claimed, specifically in combination with a movable housing, a support which rotates fully about a first axis, a sensor for sensing a characteristic of the ground, mounted on the support to fully rotate about a second axis substantially parallel to the first axis and to observe the ground as the housing is moved over the ground, with a drive mechanism driving rotation of the support at a first rate and for driving rotation of the sensor at a second rotation in a direction opposite the rotation of the support, wherein a relationship of the second rate of rotation to the first rate of rotation is such that orientation of the sensor relative to the direction of movement over the ground remains substantially constant during rotation of the support and the sensor, is not disclosed or made obvious by the prior art of record.
